

Partnering Agreement

March, 2021

We, the undersigned partners of the Washington State Department of Transportation/Associated General Contractors of Washington Partnering Steering Committee recognizes the significant role that effective partnering plays in the efficient and fair delivery of projects and agree to work together as a cohesive, cooperative team to promote the use of Partnering, both formally and informally, on our projects across the state.

The Partnering Steering Committee will remove barriers that inhibit collaborative partnering and effective communication, and strongly support those activities that allow Partnering to flourish.

Based on our collective experience in implementing partnering, we have identified the following partnering success factors and commit ourselves to their continuous improvement:

- Safety
- Open and Honest Communication
- Mutual Respect
- Provide Recognition and Awards
- Regular Assessment of Partnering Health
- Support Training and Empowerment of Field Staff
